Dental Tribune International

# JOURNAL OF ORAL SCIENCE & REHABILITATION

[www.dental-tribune.com](http://www.dental-tribune.com)

DENTAL TRIBUNE  
SCIENCE **dti** Dental  
Tribune  
International

The *Journal of Oral Science & Rehabilitation*, published quarterly as an **e-paper**. The digital circulation is subscription based.

Papers submitted to the *Journal of Oral Science & Rehabilitation* are subject to rigorous double-blind peer review. Papers are initially screened for relevance to the scope of the journal, as well as for scientific content and quality. Once accepted, the manuscript is sent to the relevant associate editors and reviewers of the journal for peer review. It is then returned to the author for revision and thereafter submitted for copy editing. The decision of the Editors-in-chief is made after the review process and is considered final.

All **e-paper** versions of all journal editions are accessible online at [www.dental-tribune.com/epaper](http://www.dental-tribune.com/epaper) and [www.dtscience.com](http://www.dtscience.com) and are sent to our global subscriber base of over 100,000 dental professionals.

Exclusive sponsorship options are available for a selected and limited number of partners. Please note: The *Journal of Oral Science & Rehabilitation* is purely scientific and designed for academic and educational purposes only. Therefore, aggressive product marketing is to be avoided. Marketing materials are reviewed by the editorial board and accepted or rejected at their discretion.

Deadlines

Once a paper has been approved by the board for release and given a publication date, advertisements will need to be submitted, at the latest four weeks prior to the online release date

Dental Tribune Science (DT Science) is an open-access online publishing platform that publishes high-quality research and clinical papers in the fields of implant dentistry, maxillofacial surgery, periodontology and dental prosthodontics. The platform's aim is to facilitate new scientific knowledge at the highest possible level with content focusing on original scientific articles, short communications, literature reviews and case reports that will help readers apply evidence-based protocols for quality dental care and oral health. In order to promote wide dissemination to both practising clinicians and researchers, access to all research is free. All manuscripts submitted are peer reviewed by an independent panel of experts. In order to ensure the validity of the work submitted, DT Science works with a number of specialist reviewers for the various dental specialties.

Unlike other open-access platforms on the market, DT Science, in association with DTI's global media platform ([www.dentaltribune.com](http://www.dentaltribune.com)) and education website ([www.dtstudyclub.com](http://www.dtstudyclub.com)), is able to offer unparalleled promotional opportunities once the material has been published. Successful journal submissions are highlighted in DTI's vast print and digital portfolio, thus making them available to a much larger audience and thereby increasing their impact. Furthermore, authors have the opportunity to publish videos and host a blog to support their work.

Companies are able to submit articles reporting on studies conducted by their research and development departments and/or opinion leaders for an article-processing fee of €2,500 per article, which includes publication of the article in the print issue of the Journal of Oral Science & Rehabilitation, on the DTScience media platform ([www.DTScience.com](http://www.DTScience.com)) and in the international e-newsletter, as well as publication of the abstract on DTI's global website ([www.dental-tribune.com](http://www.dental-tribune.com)).

Companies can also choose to support the Journal of Oral Science & Rehabilitation with a yearly sponsorship, which entitles them to publish up to four articles a year, an advertisement in each issue of the journal, the publication of the company's logo on the DTScience media platform ([www.DTScience.com](http://www.DTScience.com)) linking to the company's website and appearance of the company's logo in the e-newsletters sent to our global database. The annual sponsorship cost is €8,000.
